Chris

Answers to 5b: The date should be changed to August 2014.

Answer to 6d: I left my badge at work so I can't access the Fact Sheets or the Q&A for TOP. I do not believe that I put any lab data summary in either but I did discuss the August 2014 spill. I will need to look at the Fact Sheets and the TOP Q&A tomorrow.

Everything else looks good

Chris, Gary,

Attached please find the final draft CES response and a draft transmittal letter. Please review and feel free to make any revisions based on our meeting with Carl and Pam. I spoke with Israel and informed him that we would be sending him the response and cover letter tomorrow. He indicated that he would forward the response to TCEQ for their review.

Thanks

Chris Villarreal
